Biotinylated Cynomolgus ALPL Protein; His-Avi Tag

Product Information

Product Name Biotinylated Cynomolgus ALPL Protein; His-Avi Tag

Storage temp. Store at \leq -70°C, stable for 6 months after receipt.

Recommend to aliquot the protein into smaller quantities for

optimal storage. Please minimize freeze-thaw cycles.

Catalog# / Size GM-85158RP-25 / 25 μg

GM-85158RP-200 / 200 µg

Protein Information

Alternative Names AP-TNAP, APTNAP, HOPS, HPPA, HPPC, HPPI, HPPO, TNALP, TNAP,

TNS-ALP, TNSALP

Source Biotinylated Cynomolgus ALPL Protein; His-Avi Tag (GM-85158RP) is

expressed from human 293 cells (HEK-293). It contains AA Leu18-Ser502

(Accession # G7NUV3).

This protein carries a His-Avi tag at the C-terminus.

Purity > 95% as determined by SDS-PAGE

Endotoxin < 1 EU/μg, determined by LAL gel clotting assay

Predicted Mol Mass 58 KDa

Formulation Supplied as a 0.2 μm filtered solution of PBS, pH7.4.

Description Tissue non-specific alkaline phosphatase (TNAP) is an isoenzyme of alkaline

present in tissues such as bone, liver, and kidneys. It plays a crucial role in bone by participating in the metabolism of phosphates and the mineralization process of the skeleton. Additionally, TNAP also plays a role in fetal development and growth. In clinical practice, the activity level of TNAP is also used as a diagnostic marker for bone diseases and liver diseases. Tissue non-specific alkaline phosphatase (TNAP) is found in many different organs, but abundant in the skeletal, hepatic and renal tissues. Each subunit contains an extended central core β -beach with α -helices, while an extended N-terminal α -helix has a "crown

phosphatase encoded by the ALPL gene in the human body. TNAP is mainly

domain". The crown domain can be characterised as a loose interfacial loop with

amino acid residues involved in stabilizing the binding of non-competitive

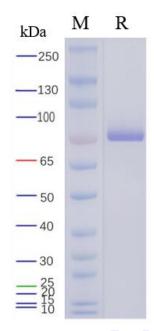

inhibitors to the enzyme.

SDS-PAGE

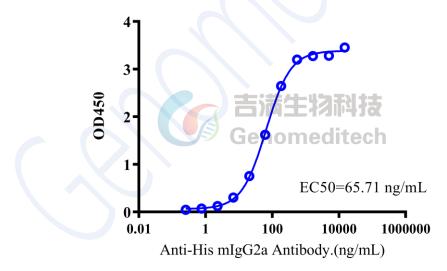

On SDS-PAGE under reducing (R) condition. The gel was stained overnight with Coomassie Blue. The purity of the protein is greater than 95%.

Bioactivity-ELISA

Bioactivity-ELISA

0.1 µg Biotinylated Cynomolgus ALPL Protein; His-Avi Tag of per well

Biotinylated Cynomolgus ALPL Protein; His-Avi Tag (Catalog # GM-85158RP) was immobilized at 1 μ g/ml (100 μ L/well) on streptavidin precoated. Increasing concentrations of Anti-His mIgG2a Antibody (Catalog # GM-59493AB) were added.
