

Mouse IL-4R alpha Protein; His Tag

Product Information

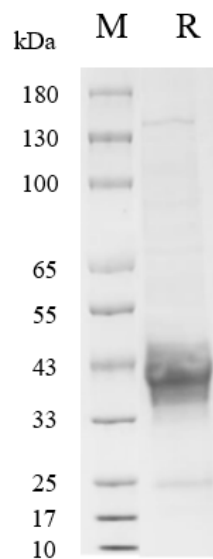

Product Name	Mouse IL-4R alpha Protein; His Tag
Storage temp.	Store at $\leq -70^{\circ}\text{C}$, stable for 6 months after receipt. Recommend to aliquot the protein into smaller quantities for optimal storage. Please minimize freeze-thaw cycles.
Catalog# / Size	GM-87882RP-100 / 100 μg GM-87882RP-1000 / 1 mg

Protein Information

Alternative Names	IL4R,CD124,IL4RA
Source	Mouse IL-4R alpha Protein; His Tag (GM-87882RP) is expressed from human 293 cells (HEK-293). It contains AA Ile 26 - Arg 233 (Accession # P16382-1). This protein carries a His tag at the C-terminus.
Purity	> 90% as determined by SDS-PAGE
Endotoxin	< 1 EU/ μg , determined by LAL gel clotting assay
Predicted Mol Mass	23.6 KDa
Formulation	Supplied as a 0.2 μm filtered solution of PBS, pH7.2-7.4.
Description	<p>Interleukin4 (IL4) is a cytokine with several important functions in the immune system. It primarily helps activate B cells and produce antibodies, especially IgE antibodies related to allergies. It also promotes the differentiation of T helper cells into Th2 cells, supporting humoral immune responses. Additionally, IL4 can help suppress inflammation in certain situations, maintaining immune balance. It is mainly secreted by activated T cells, mast cells, and basophils, and serves as a key target for interventions in various diseases, including allergies and asthma. Due to its crucial role in immune regulation, IL4 has been a significant focus in immunology research.</p> <p>The IL4RA protein, also known as the interleukin-4 receptor alpha chain, is an important cell surface receptor primarily involved in regulating the immune system. When it binds with interleukin-4 (IL-4), it triggers signaling pathways that promote T cell differentiation and B cell proliferation. IL4RA plays a significant role in allergic reactions and asthma, and its gene polymorphisms are associated with susceptibility to various immune-related diseases.</p>

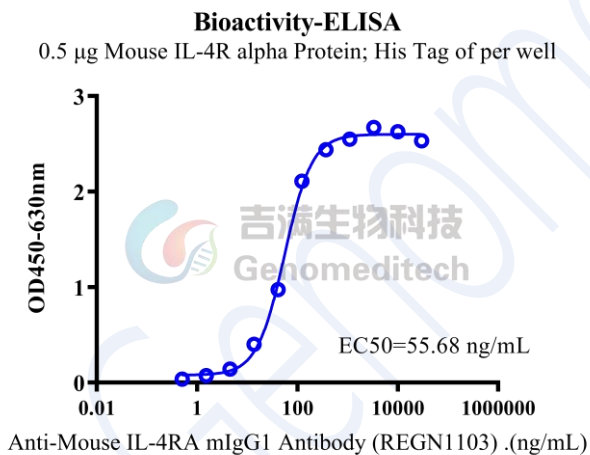

Version:4.0

SDS-PAGE

On SDS-PAGE under reducing (R) condition. The gel was stained overnight with Coomassie Blue. The purity of the protein is greater than 90%.

Bioactivity-ELISA

Mouse IL-4R alpha Protein; His Tag (Catalog # GM-87882RP) was immobilized at 5 µg/ml (100 µL/well).
 Increasing concentrations of Anti-Mouse IL-4RA mIgG1 Antibody(REGN1103) (Catalog # GM-88068AB) were added.
